Sharilyn Dienst called re: Vulcan

Sharilyn had several questions/concerns about KDHE public notice on major mod. to air permit. (copy of public notice attached)

- Fact sheet says will hold public hearing if sufficient public interest & requests rec'd. incl. reasons for hearing. Sharilyn thought this wording was rather strange. She ask about RCRA basis for pub. hearing. Told her if we rec'd. one request would hold hearing, & that 124 says requests for hearings shall incl. reasons.
- Sharilyn said the Fact Sheet says CO, NO_x & particulate levels will increase but will not impact anything.
- Sharilyn has 20 on attainment areas - just Wichita or Sedgwick Co.? The citizens think something more than opacity should be done?
- The citizens think timing of pub. notice on major pmt. mod. is bad, particularly since other air issues have not been resolved.
- They are concerned about Fact Sheet & pub. notice wording is unclear & indicates that CO, NO_x & particulate levels will increase.
- They think EPA should be involved in this permit action. They plan to request such in a letter. Think EPA should be in

2/2

- oversight role.
- They want to know if any air monitoring will be done.
 - Sharilyn would like a copy of Federal regs. cited in KDHE public notice - apparently at least Parts 52 & 60.
 - Sharilyn wanted to know about RCRA involvement - told her only wrt releases.

Karen Flownoy

Sidelight: Apparently John Mitchell, KDHE, thought they (KDHE) were going to take Health Questionnaires at public mtg. - but he was overruled.
